

SmartWorkHub Website Full Project

Complete website source package for SmartWorkHub AI Assistants & Automation.

What is included

This project is a full Vite + React + Tailwind website structure, not just a single JSX file. It includes the homepage, data file, reusable components, Tailwind setup, package configuration, deployment guide, and booking/inquiry sections.

Website sections

Section	Purpose
Hero	Clear positioning for done-for-you AI assistant systems.
Services	Personal AI Assistant, AI Content Workflow Assistant, and Executive AI Assistant.
How It Works	Explains discovery, configuration, build, testing, delivery, and support.
Packages	Starter, Workflow, and Command Center package structure.
Support	Monthly hosting, monitoring, maintenance, and normal AI usage plans.
Infrastructure	Explains the backend workflow routing, tools, logs, and approval-first system.
Portfolio	AgencyOps sample project and practical workflow proof.
Booking	Calendly booking section with placeholder URL ready to replace.
Inquiry Form	Front-end form ready to connect to backend, n8n, Google Sheets, or email later.
FAQ	Buyer objections and scope explanations.

Important edits before publishing

1. Replace the placeholder Calendly URL in src/data.js with your real Calendly event link.
2. Confirm the contact email in src/data.js.
3. Connect the inquiry form to Formspree, Tally, Google Sheets, n8n webhook, or your own backend.
4. Deploy using Vercel, Netlify, or your VPS.

Main commands

```
npm install
```

```
npm run dev
```

```
npm run build
```
